

23/07/2026 EX:03 - PACKET TRACER TOOL INSTALLATION AND USER INTERFACE.

Aim:

To study the packet tracer tool installation and user Interface overview.

PROCEDURE:

1. From the network component box, click and drag and drop the below components:
   (a) 2 Generic Pc's and one HUB.
   (b) 2 Generic Pc's and one switch.

2. Click on connections:
   (a) Click on copper straight through cable
   (b) select one of the PC and connect it to the HUB. using the Cable. The link LED should glow in green, indicating that the link is up.

3. Click on the Pc's connected to the HUB, go to the desktop tab, click on IP Configuration and enter the IP address and subnet mask.
Click on the PDU (message icon) from the common tool bar.

→ Drag and drop it on one of Pc (source machine) and then drop it on another Pc (destination machine) Connected to the HUB.

4. Observe the flow of PDU from source Pc to destination Pc by selecting the realtime mode of simulation.

5. Repeat step 5 for the Pc's connected to the switch.

6. Observe how HUB & switch are forwarding the PDU. and

⇒ Hub and Switch connection Network:

1. From the network devices component box, drag and drop: 1 switch, 1 hub and 3 PC's.

2. Click on Connections and select Copper straight through Cable. (a) Connect PC0 → switch
(b) Connect switch → Hub
(c) Connect Hub → PC1
(d) Connect Hub → PC2

3. Click on each PC, go to desktop → IP configuration and assign IP addresses in the same network.

4. Switch to simulation Mode and select add Simple PDU.

5. Send a PDU from PC0 to PC1 and observe the packet flow.

6. Repeat the same by sending a PDU from PC0 to PC2 and observe the forwarding of switch and hub.

Result:

The packet tracer tool installation and user Interface overview has studied and done successfully.
